

Technical data sheet

AKR Reinforced Angle Bracket

SIMPSON

Strong-Tie®

The AKR bracket is reinforced around the bend, which significantly increases the rigidity and strength of the bracket.

- One-piece connector.
- Reinforced corners provide enhanced performance.
- CNA nails must be used to achieve the published loads.

Features

Material

Steel:

S 235JR acc. EN 10025

Corrosion protection:

Hot dip galvanized after fabrication acc. to EN ISO 1461 - zinc layer thickness approx.55 µm

Benefits

- Load capacity in all directions
- Full and partial nailing
- Single or double sided connections
- Optional mounting with a distance to the support, only for tension connections
- Optimized bolt utilisation

Applications

Header member

Supporting member:

- Concrete, steel

Supported member:

- Timber, engineered wood

Applications

- The AKR angle brackets enable optimised connections between timber and other materials, like concrete, steel, etc.
- According to their overall galvanization the AKR angle brackets could be used in outdoor areas

*) Bolte, f.eks. WA, BoAX II eller lignende, disse skal undersøges separat.

Faktor til at beregne / check boltene, for forbindelser med 2 AKR

Retning belastning	k _{ax}	k _{lat}
F ₁ bolt 1 og bolt 2	0,5	0
F _{2/3} bolt 1 og bolt 2	0,2	0,5
F _{4/5} bolt 1 for F _{1,d}	1	0
F _{4/5} bolt 2	0,5	1

Den AKR hvor lasten F_{4/5} virker ind mod beslaget (bolt 1 på vist eksempel) skal checkes for:

$$F_{1,d}^* = \frac{F_{4/5,d} \times (e - 16,5\text{mm})}{b + 83\text{mm}}$$

Eftervisning

Ved kombineret last skal der eftervises:

$$\left(\frac{F_{1,d}}{R_{1,d}} + \frac{F_{4/5,d}}{R_{4/5,d}} \right)^2 + \left(\frac{F_{2/3,d}}{R_{2/3,d}} \right) \leq 1$$

Installation

Fixing

- Fixing on timber members with CNA4,0xl threaded nails or optional with CSA5,0xl screws and to concrete / steel with bolts M12 and a washer Ø24.
- Single or double sided connections are possible.
